106 responses

I think

- 1) we should focus more on practical knowledge and conduct more practicals as much as we can
- 2) we should bring the new internships and other online or offline courses for the students so they will know the actual field work
- 3) Our syllabus must include the current things which are going on in the field of science so it would fun in studying every subject and It's also a need of time.

Its already perfect. Doesn't need anything to change.
